| Closeout Report for the Building 980 Cluster, Rev. 0   |           |
| Closeout Report for the Building 980 Cluster, Revision 0, October 9, 1997. The purpose of this Report is to document the post demolition configuration of the 980 Cluster (Buildings 980, 965, and 968). This reports includes: the radiological survey results delineated in the Closeout Radiological Survey Plan; the data which demonstrates that residual radioactive material, existing in the Cluster, is below levels that comply with established Rocky Flats Environmental Technology Site (RFETS/Site) unrestricted release criteria; a description and disposition of hazardous materials removed from the facility prior to demolition; a description and disposition of construction of debris and recycled materials released; and the final configuration of all utilities in the cluster. |           |

| Closeout Radiological Survey Plan for the Building 980 CLuster  |           |
| Closeout Radiological Survey Plan for the Building 980 Cluster. The purpose of this CRSP is to define the methods for collecting, analyzing and documenting data to demonstrate that residual radioactive material existing in the B980 Cluster are below levels that comply with established Rocky Flats Environmental Technology Site (RFETS) unrestricted release criteria. Those areas that contain radioactive material above the unrestricted release criteria will be decontaminated to meet the release criteria or be released in a restricted manner. |           |

| Baseline Characterization of Proposed Concrete Rubble Storage Area at Former B980 Site, September 22, 1999   |           |
| Baseline Characterization of a Proposed Concrete Rubble Storage Area at the Former Building 980 Site, September 22, 1999. This report documents the baseline characterization of an area proposed for storage of concrete rubble originating from Deactivation and Decommissioning (D&D) activities at the Rocky Flats Environmental Technology Site (RFETS) located near Golden, Colorado. These activities were performed in support of the draft Rocky Flats Cleanup Agreement (RFCA) Standard Operating Protocol RSOP for Recycling Concrete (K-H, 1999) and the project specific Sampling and Analysis Plan (SAP)(RMRS, 1999). The area assessed includes the former Building 980 concrete slab and the surrounding areas to the east, south, and west. |           |

| PAM for Decommissioning of B980 Cluster, August 1997, Revision 0   |           |
| Rocky Mountain Remediation Services, L.L.C. (RMRS) submits Proposed Action Memorandum (PAM) for the Decommissioning of the Building 980 Cluster, dated August 1997, Revision 0. The proposed action consists of backgrounds on foundations, structural framing, exterior walls, floors, roofs, interior walls, ceilings, doors, windows and surface finishes. A building hazard summary is addressed, a project management overview and decommissioning objectives are discussed.  |           |

| Submits: Transmittal of 980 PAD Disposition/Closeout Report  |            |
| Submits: In 1997, demolition of Building 980 occurred under the Proposed Action Memorandum (PAM) for the Decommissioning of the Building 980 Cluster (97-RF-01243). The building pad and underground utilities were left in place, to be removed at a later date. Please note that a copy of the original Closeout Report for the Building 980 Cluster was apparently submitted to Colorado Department of Public Health and Environment (CDPHE) without a cover letter, this letter also formally transmits that report. In 2000, in accordance with the Rocky Flats Cleanup Agreement (RFCA) Rocky Flats Cleanup Agreement Standard Operating Protocol (RSOP) for Recycling Concrete, the 980 was Pad was approved for use as a concrete Rubble storage area. The pad was used for storage of concrete rubble until September 2004. After all of the stored concrete rubble was removed, the 980 Pad was removed; the underside of the pad was surveyed and determined to meet free release criteria. |            |
